PREFACE

California Prisoners and Parolees, 1992, is a presentation of statistical data about felons, civil narcotic addicts and other populations under the jurisdiction of the California Department of Corrections (CDC). Statistical data on felons in CDC have been published since 1950 when the first issue of *California Prisoners*, covering the years 1945 through 1949, was released. Statistical data on civil narcotic addicts have been published since 1967 when the first issue of *Summary Statistics, Civil Commitment Program for Narcotic Addicts*, covering the years 1961 through 1966, was published. Beginning in 1981, the two were combined into one publication.

This publication is organized into seven chapters with a Data Section containing information on different types of populations under CDC jurisdiction. Within each chapter, summary data are illustrated through descriptive text, charts, and graphs recording trends and providing comparisons of the constantly changing CDC population. More in-depth information for each chapter is provided in the tables located in the Data Section. These tables are referenced throughout the text as the source for charts and graphs. The last section of the book is the Reference Guide. The Reference Guide provides a list of prisons by name and location; maps identifying counties, areas of commitment, and parole regions; and a glossary of terms and acronyms used throughout the publication.

The Director of Corrections administered twenty-four institutions, four parole regions, and thirty-eight camps during 1992. The types of commitments received by CDC are Felons, Civil Narcotic Addicts, County Diagnostic Cases (under Penal Code Section 1203.03), some Youth Authority commitments, federal prisoners, and prisoners from other states. This publication contains only a portion of the data available in report format. If you have a request for additional data or have any questions regarding the presentation of these data, please call (916) 327-3262 or CALNET 457-3262.

BEHAVIOR OF INMATES IN CDC INSTITUTIONS

HIGHLIGHTS

The number of incidents in institutions decreased from 4,184 during calendar year 1990 to 4,120 during 1991.

The rate of incidents per 100 average daily institution population has been decreasing steadily since reaching a high of 12.7 during calendar year 1984. By 1991, the rate had declined to 4.3.

The number of inmate assaults on staff increased from 858 during calendar year 1990 to 919 during 1991. However, during the same time period the rate per 100 average daily population remained the same at 1.0.

The number of escapes from institutions and camps increased from 74 during calendar year 1991 to 83 during 1992. Most of the escapes were walkaways from camps and minimum security facilities.

The number of escapes from Community Correctional Centers (Work Furlough, etc.) increased from 1,122 during calendar year 1991 to 1,409 during 1992. The rate per 100 population at risk also increased from 4.9 to 6.3 for the same time period.
